2021年06月25日 08:30-17:30

中国·上海浦东丽思卡尔顿酒店

新型城镇化建设已成为今年重点投资方向之一。

未来主要城市群、都市圈的发展将改变中国现有的城市格局，推动产业、人口、资金等要素不断向中心城市集聚。根据新型城镇化建设进程，未来在基础设施和房地产行业投资开发的结构性发展潜能就在城市群和都市圈的建设。这一聚集性的扩张发展，最终会形成内核、内圈以及外圈的“1小时通勤圈”。对于资本来说，新的风口或已经出现。

随着移动互联网的大潮汹涌而来，平台经济、共享经济兴起，跨界与融合已成为大势所趋。同时，政府大力支持信息基础设施建设和技术研发，为各行业的转型升级提供了良好的外部环境。

本届 RICS 中国峰会将聚焦中国城市的创新与发展，结合相关领域的金融市场政策，把脉最新的行业投资动向，并围绕中国建筑业转型策略和房地产行业的多元化发展展开深入的探讨与分享。希望通过专业的多角度思维碰撞，助力中国创新与可持续发展的长期目标。

RICS China Summit 2021

- Infrastructure Construction and Urban Services under the Pattern of Innovation

25th Jun 2021, 08:30-17:30

The Ritz-Carlton, Pudong, Shanghai

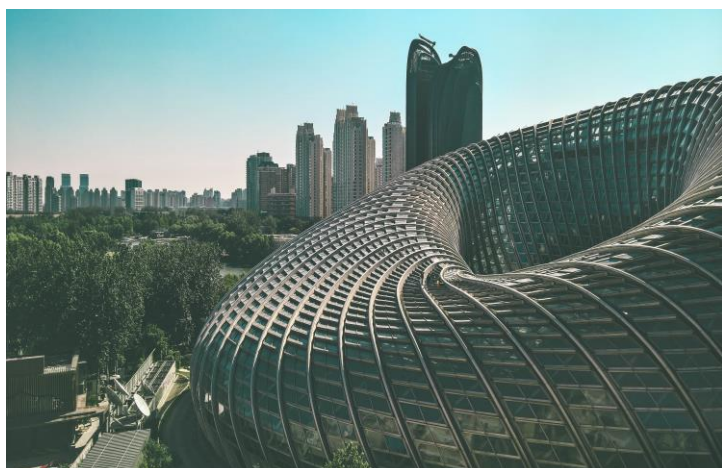

The construction of new urbanization has become one of the key investment directions this year.

In the future, the development of major urban agglomerations and metropolitan areas will change the existing urban pattern in China, and promote the continuous aggregation of industries, population, capital and other factors to central cities.

According to the new urbanization construction process, the coming structural development potential of investment and development in infrastructure and real estate industry lies in the construction of urban agglomerations and metropolitan areas. This aggregative expansion will eventually result in a "one-hour commute" between the core, inner, and outer rings of a city. On capital side, new opportunities may have emerged.

With the rise of mobile Internet, platform economy and sharing economy, crossover and integration have become a general trend. At the meantime, the government strongly supports the construction of information infrastructure, technology research and development, which provides a good external environment for the transformation and upgrading of various industries.

The RICS China Summit 2021 will focus on the innovation and development of cities, take financial market policies into account, examine the latest industry investment trends, and carry out in-depth discussion on the transformation strategy of construction and the diversified development of the real estate industry to achieve a long-term goal of sustainability.
