# Our Principles

- **Reconnection to nature:** the longer we live in urban agglomerations the more we become disconnected from the planet. We design experiences which get you dirty and help you to cherish the simple marvels of nature.
- **Reconnection to people:** Knowledge economies and information overload have glued us to screens. We encourage mobile and computer free weekend and full attention on our interpersonal relationships.
- **Interdisciplinary and holistic learning:** we take you out of the classroom and deep into nature and make learning a holistic and enjoyable experience for the entire family.
- **Instilling purpose:** many contemporary mental health issues like ADHD, burnout or procrastination are caused by a lack of purpose and meaning in what we do. We generally look at adults when we discuss these problems, but children from age 4 onwards equally require purpose in their life.
